PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience developing scalable web and mobile applications using JavaScript, TypeScript, React.js, Angular, React Native, Node.js, Express.js, and MongoDB. Experienced in building RESTful APIs, authentication systems, microservices, real-time applications, Redis caching, Kafka, Docker, and CI/CD. Strong problem-solving skills with a focus on performance optimization, scalable architecture, and production-ready application development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Angular, Next.js, React Native, Redux Toolkit, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, GraphQL, JWT Authentication, OAuth, Socket.io, WebSockets
Databases: MongoDB, Mongoose, PostgreSQL, Redis
Architecture: Microservices, Event-Driven Architecture, Apache Kafka, MVC Architecture
Cloud & DevOps: Docker, GitHub Actions, CI/CD, GCP, AWS
Tools: Git, GitHub, Bitbucket, Jira, Postman

PROFESSIONAL EXPERIENCE

Suma Soft Pvt. Ltd., Pune May 2024 – May 2026
Software Engineer

- Developed scalable web and mobile applications using React.js, Angular, React Native, Node.js, Express.js, TypeScript, and MongoDB.
- Developed reusable Angular components, services, forms, and API integrations using TypeScript for scalable web application modules.
- Integrated Angular applications with RESTful APIs, implementing authentication, data management, form validation, and reusable UI components.
- Designed and developed scalable backend services using Node.js, Express.js, TypeScript, and MongoDB for production web and mobile applications.
- Developed and integrated 25+ RESTful APIs supporting authentication, user management, payments, notifications, and core business workflows.
- Implemented secure authentication and authorization using JWT, Role-Based Access Control (RBAC), OTP verification, and Google OAuth.
- Implemented real-time communication and notification features using Socket.io and WebSockets, enabling instant updates and seamless user interactions across web and mobile applications.

PROJECTS

UBI Meat Platform *React Native, React.js, Ruby on Rails, TensorFlow, WebRTC*

AI-powered meat grading platform consisting of a mobile application for field inspections and web-based applications for quality assessment, reporting, and operational management.

- Developed a production-ready React Native mobile application for field inspectors to capture meat images and perform real-time quality assessments using TensorFlow-based computer vision models.
- Implemented end-to-end meat grading workflows, enabling automated image analysis, grading results, inspection tracking, and quality assessment with improved consistency and operational efficiency.
- Developed responsive web dashboards using React.js and Angular for monitoring grading results, managing inspection records, reviewing quality reports, and tracking operational activities.
- Built reusable React.js and Angular components, services, forms, and API integrations to create maintainable and scalable web application modules.
- Integrated React Native WebRTC to enable real-time video communication between field operators, inspectors, and quality assurance teams for remote inspection and support.
- Developed and integrated Ruby on Rails backend services for image processing, grading analysis, user management, inspection workflows, report generation, and data management.
- Integrated frontend and mobile applications with RESTful APIs for secure data exchange, real-time updates, inspection management, and quality assessment workflows.
- Optimized mobile, web, and backend workflows for performance, scalability, and reliability.

Ejobify Job Portal & E-Learning Platform *(React Native, Socket.io, Node.js, Express.js, MongoDB, Redis, Razorpay)*

Production-grade job portal and e-learning platform featuring secure authentication, subscription management, real-time notifications, and scalable backend services.

- Designed and developed scalable backend services and RESTful APIs for authentication, job management, course enrollment, subscriptions, user profiles, and content management supporting 10,000+ users.
- Implemented JWT authentication, Google Sign-In, OTP verification, and role-based access control (RBAC) to secure application access.
- Integrated Razorpay payment gateway with secure payment processing, subscription workflows, and webhook handling.
- Built real-time notifications and user engagement features using Socket.io to deliver instant updates.
- Optimized MongoDB performance through schema design, indexing, aggregation pipelines, and Redis caching, significantly improving API response times.
- Developed and integrated the React Native mobile application with backend APIs, delivering seamless job search, course enrollment, and subscription experiences.

O-Rickshaw Ride Booking Platform *(Angular, React.js, Node.js, Express.js, MongoDB, Socket.io, Google Maps API, Razorpay)*

Real-time ride booking platform consisting of customer, driver, and admin modules for ride management, live tracking, payments, and operational analytics.

- Developed responsive web application modules using Angular, TypeScript, reusable components, services, and reactive forms.
- Integrated Angular applications with RESTful APIs for ride booking, trip management, driver allocation, customer management, and admin operations.
- Implemented reusable Angular components and services for authentication, ride management, dashboards, and real-time application workflows.
- Integrated Google Maps APIs for real-time location tracking, route optimization, pickup/drop selection, and distance calculation.
- Built real-time ride tracking, booking status updates, and driver notifications using Socket.io.
- Integrated Razorpay payment gateway with secure transaction processing and webhook handling.
- Optimized MongoDB queries, indexing, and backend performance to improve scalability and API response times.

News Platform *(React.js, Node.js, Express.js, MongoDB)*

MERN Stack content management platform for creating, managing, publishing, and moderating news articles with role-based access control and dynamic content workflows.

- Developed a responsive React.js frontend using reusable components, React Hooks, Context API, and modular UI architecture.
- Designed and implemented RESTful APIs using Node.js and Express.js for article creation, editing, publishing, user management, authentication, and content moderation.
- Implemented secure authentication and role-based access control for administrators, editors, and end users with protected application routes.
- Developed dynamic article management workflows supporting content creation, editing, publishing, updating, and moderation.
- Implemented search, filtering, categorization, and dynamic content rendering to improve news discovery and user experience.
- Optimized MongoDB schemas, queries, and API responses to improve application performance, and scalability.
- Followed modular MERN Stack architecture and reusable development practices for maintainable, scalable, and production-ready applications.

EDUCATION

B.Tech in Computer Science Engineering 2023
Dr. Babasaheb Ambedkar Technological University, Maharashtra

Diploma in Computer Engineering 2020
Maharashtra State Board of Technical Education, Mumbai

CERTIFICATIONS

MERN Stack Developer – (ITPreneur, Pune)
Core Java – (Naresh IT, Hyderabad)
Oracle 11g – (Naresh IT, Hyderabad)
