PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience developing web and mobile applications using React.js, React Native, TypeScript, Node.js, Express.js, and MongoDB. Skilled in reusable UI components, RESTful APIs, authentication, payment integration, real-time communication, and database optimization, with a focus on building secure and maintainable applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL
Frontend: React.js, Angular, Vue.js, Next.js, Redux Toolkit, HTML5, CSS3, Material UI (MUI)
Mobile: React Native, Expo
Backend: Node.js, Express.js, RESTful APIs, GraphQL
Authentication & Real-Time: JWT, OAuth, RBAC, Socket.io, WebSockets, SSE
Databases: MongoDB, Mongoose, PostgreSQL, Redis
Architecture: Microservices, Event-Driven Architecture, Apache Kafka, MVC
Cloud & DevOps: Docker, GitHub Actions, CI/CD, GCP, AWS
Tools: Git, GitHub, Bitbucket, Jira, Postman

PROFESSIONAL EXPERIENCE

Suma Soft Pvt. Ltd., Pune May 2024 – May 2026
Software Engineer

- Developed and maintained web and mobile applications using React.js, Angular, React Native, TypeScript, Node.js, Express.js, and MongoDB.
- Built reusable UI components, forms, and services using React.js and Angular, implementing REST API integration, form validation, and state management.
- Integrated frontend applications with backend services, handled API responses and error states, and developed responsive user interfaces for web and mobile platforms.
- Collaborated with cross-functional teams to debug application issues, review code, troubleshoot defects, and maintain code quality using Git and established development workflows.
- Designed and developed backend services and RESTful APIs using Node.js, Express.js, TypeScript, and MongoDB for user management, payment processing, notifications, and business operations.
- Implemented secure authentication and authorization using JWT, role-based access control (RBAC), OTP verification, and Google OAuth.
- Developed real-time notification and communication features using Socket.io and WebSockets to support live application updates.

PROJECTS

UBI Meat Platform *(React Native, React.js, Ruby on Rails, TensorFlow, WebRTC)*

AI-powered meat grading and quality assurance platform designed to help meat processors assess and document quality standards in real time, improve grading consistency, and monitor production through cloud-based workflows.

- Developed a React Native mobile application for meat inspections, image capture, and quality assessment using TensorFlow-based computer vision models.
- Developed Ruby on Rails backend services for image processing, grading analysis, user management, and automated quality report generation.
- Integrated mobile and web applications with RESTful APIs for inspection data exchange, AI-based grading results, real-time data synchronization, and quality report management.
- Built responsive React.js dashboards for grading result visualization, inspection record management, and quality assurance reporting.
- Customized Material UI (MUI) components based on client requirements, modifying table layouts, column configurations, and data presentation to improve usability.
- Implemented WebRTC-based video communication to support remote inspections and real-time collaboration between users.
- Developed end-to-end inspection and data management workflows across mobile and web applications to support traceability, quality documentation, and consistent quality monitoring.

Ejobify Job Portal & E-Learning Platform *(React Native, Socket.io, Node.js, Express.js, MongoDB)*

Job portal and e-learning platform supporting job management, course enrollment, subscriptions, and mobile application workflows.

- Designed and developed scalable backend services and RESTful APIs for authentication, job management, course enrollment, subscriptions, user profiles, and content management.
- Implemented JWT authentication, Google Sign-In, OTP verification, and role-based access control (RBAC) to secure application access.
- Integrated Razorpay payment gateway with secure payment processing, subscription workflows, and webhook handling.
- Built real-time notifications and user engagement features using Socket.io to deliver instant updates.
- Applied MongoDB schema design, indexing, aggregation pipelines, and Redis caching to support efficient data access.
- Developed and integrated the React Native mobile application with backend APIs, delivering seamless job search, course enrollment, and subscription experiences.

O-Rickshaw Ride Booking Platform *(Angular, React.js, Node.js, Express.js, MongoDB, Socket.io, Server-Sent Events (SSE), Redis, Google Maps API, Razorpay)*

Real-time ride booking platform consisting of customer, driver, and admin modules for ride management, live tracking, payments, and operational analytics.

- Developed Angular and React.js components and TypeScript modules for ride booking, driver allocation, trip management, and administration.
- Integrated Google Maps APIs for location selection, live tracking, route information, and distance calculation.
- Implemented real-time ride-status updates and driver notifications using Socket.io and Server-Sent Events (SSE).
- Developed Node.js and Express.js REST APIs for ride requests, driver management, trip lifecycle operations, and booking data.
- Integrated Razorpay payment processing and implemented authentication and role-based access for customer, driver, and admin modules.
- Optimized MongoDB queries, schema design, and indexing, and used Redis caching to support efficient data access.

News Platform *(React.js, Node.js, Express.js, MongoDB)*

MERN Stack content management platform for creating, managing, publishing, and moderating news articles with role-based access control and dynamic content workflows.

- Built a responsive React.js frontend using reusable components, Hooks, and Context API, with article search, filtering, and categorization.
- Built Node.js and Express.js APIs for article publishing, editing, user management, and content moderation.
- Secured application routes using authentication and role-based access control for administrators, editors, and users.
- Improved data access and maintainability through MongoDB query optimization and modular application design.

EDUCATION

B.Tech in Computer Science Engineering 2023
Dr. Babasaheb Ambedkar Technological University, Maharashtra

Diploma in Computer Engineering 2020
Maharashtra State Board of Technical Education, Mumbai

CERTIFICATIONS

MERN Stack Developer – (ITPreneur, Pune)
Core Java – (Naresh IT, Hyderabad)
Oracle 11g – (Naresh IT, Hyderabad)
